ATİLLA CANTAY GÜL

SOFTWARE ENGINEER

İzmir, Türkiye | atillacantay@gmail.com | +90 554-555-2838 | <u>My Website</u>

SUMMARY

Software Engineer with **4+ years** of experience in **Front-End** and **Full-Stack** development, specializing in building scalable, user-focused solutions. Proficient in modern technologies, including **React**, **Next.js**, **Vue.js**, **JavaScript**, **TypeScript** and **Node.js**. Passionate about delivering high-quality code, enhancing performance and staying at the forefront of technological innovation.

TECHNICAL PROFICIENCIES

TypeScript, JavaScript, React, Next.js, Vue, Nuxt, HTML, CSS, TailwindCSS, Shadcn/UI, Material UI, CMSs (Contentful, Storyblok), Commercetools, Node.js, NestJS, REST APIs, GraphQL, NoSQL, MongoDB, Git, WebSocket

Tools: Github, Gitlab, Bitbucket, Jira, Confluence, VSCode, Figma, Microsoft Teams, Slack

---

SOFT SKILLS

Adaptability, Scrum Development, Decision Making Techniques, Software Quality Assurance, Self-improvement, Cross-functional Team, Teamwork and Collaboration

---

PROFESSIONAL EXPERIENCE

Software Engineer (05/2024 - Present)
EPAM Systems

- **<u>Goody Kitchen Website (Saudi Arabia)</u>**
  - Redesigned UI/UX using **Kentico CMS**, leveraging **Static Site Generation (SSG)** and **MVC** principles for better scalability and performance.
  - Developed responsive features using **TypeScript**, **React**, **HTML**, **TailwindCSS**, **Storybook** and **Vite** for optimized builds.
  - Delivered a **multilingual** website with Arabic and English support with a right-to-left (RTL) layout.
  - Created a **Proof of Concept** (**PoC**) application with **Next.js** and **Contentful CMS**, replacing outdated architecture to boost SEO, site performance and streamline content management.

- **<u>Nemedio QMS Application (USA)</u>**
  - Contributed to a multi-tenant **SaaS QMS** application, delivering new features, pages and UI/UX improvements.
  - Designed and implemented visual aids using **AG Grid** to present large datasets, empowering stakeholders to analyze data more effectively.
  - Collaborated with a full-stack team using **JavaScript**, **TypeScript**, **React**, **Material UI**, **Ruby on Rails**, **PostgreSQL** and **GraphQL**.
  - Led major updates for **React** and **TypeScript** versions, resolving compatibility issues and ensuring **CK Editor** maintenance to optimize content editing capabilities.
  - Utilized tools like **Snyk** and **CircleCI** to address security vulnerabilities and streamline deployment pipelines.
  - Learned and executed **AWS** test server deployments during final stages.
  - Collaborated with a global team.

- **<u>Goody Kitchen AR Microsite (Saudi Arabia)</u>**
  - Enhanced UI/UX and implemented new features for a mobile-exclusive microsite, ensuring a seamless and engaging user experience.
  - Optimized the transition from an AR app, leveraging **React** and **TypeScript** to improve performance and usability.

Software Engineer (10/2021 - 05/2024)
WittyCommerce, part of Emakina Group & EPAM Systems

- **Berlin Brands Group Webshops (Germany)**
  - Contributed to the development of a multi-tenant **SaaS** platform utilizing **Nuxt**, **Vue Storefront**, **Commercetools** and **Storyblok**, aiming to migrate over **70 webshops.**
  - Successfully launched some of the platforms in **Germany** and **the UK** supporting customized themes, currencies, languages and payment methods.
  - Developed new CMS components and built the **Product Detail Page** (PDP).
  - Created documentations and developed a product review management app using **React** for internal client use.
  - Participated in the integration of third-party applications such as **Curator.io**, **Dynamic Yield**, **Adyen** and **Paypal**.
  - Entrusted with the development and maintenance of multiple webshops post-launch, overseeing deployments, implementing new features and customizations.
  - Collaborated with a global team to ensure seamless project delivery.

- **Rivoli Vision & Shop (UAE)**
  - Participated in the development of an e-commerce platform leveraging **Nuxt**, **Vue Storefront**, **Commercetools** and **Contentstack** as the **Headless CMS**.
  - Developed a platform for the **UAE**, **Oman**, **Bahrain** and **Qatar**, supporting both Arabic and English languages with a right-to-left (RTL) layout.
  - Held responsibility for adding new features, resolving bugs, integrating third-party payment solutions and developing custom CMS components.
  - Collaborated in a Scrum-based environment, following biweekly release cycles to ensure timely and efficient project delivery.

Full Stack Engineer (09/2020 - 10/2021)
Monday Hero

- Played a key role in the development of Monday Hero, a platform that transforms designs from **Sketch**, **Adobe XD** and **Figma** into mobile code for **Swift**, **Android** and **Flutter**.
- Successfully built the **Electron** (**React**) application from scratch, demonstrating full-stack capabilities while utilizing **NestJS** and **MongoDB**.
- Enhanced platform functionality and user experience by developing the **Figma integration** and a **custom Figma Plugin** to streamline the design-to-code workflow.
- Contributed to the core algorithm.
- Created documentations to facilitate team collaboration and enhance overall efficiency.

Software Intern (06/2019 - 09/2019)
Alternet

- Designed and implemented a WebSocket-enabled note-taking platform with real-time interactive note sharing and customizable features.
- Built with **React**, **Redux**, **Material UI**, **Node.js**, **MongoDB** and **WebSocket**, ensuring a responsive and user-friendly experience across devices.

EDUCATION

Computer Science (2018 - 2019)
Bialystok University of Technology - **3.94/4.0**

Computer Engineering (2016 - 2020)
Pamukkale University - **3.7/4.0**
- Highest Ranking Student
